

# Sonoma Mountain Village SmartCode

Village Square (MBH Architects)

## Description:

The original Master Plan and Infill SmartCode for this project was designed by Fisher & Hall Urban Design. Lois Fisher was the Director of Design during that time. This neighborhood is being designed on the site of a former Agilent campus. It is located within the city limits of Rohnert Park in Sonoma County, California, and is an innovative redevelopment of a high tech campus with a focus on creating a pedestrian-friendly and 'green' place to live, work, shop and play. Fisher Town Design is doing continuing work on this project, which will include a village square surrounded by mixed-used buildings (former Agilent buildings), a range of residential building types - cottage courts, single-family homes, live-work, apartments, townhouses and mansions - as well as shops, cafes, a movie theater, parks and civic buildings. One of the design goals for the project is to become LEED-ND certified. (LEED-ND is Leadership in Energy and Environmental Design - Neighborhood Development.)

Location: Rohnert Park, California  
 Type: Mixed-use village and SmartCode  
 Design: 2005 - current  
 Status: Conceptual design  
 Size: 200 acres  
 Contact: Brad Baker, President  
 Coddling Enterprises  
 (707) 795-3550
